Profile

Backend-leaning full-stack software engineer with 3+ years of experience building production-grade SaaS platforms, CRM systems, REST APIs, integrations, multi-tenant applications, and internal business systems. Strong across backend architecture, API design, data modeling, scalable front-end delivery, authentication, cloud deployment workflows, and product-focused engineering. Experienced with Node.js, NestJS, Java Spring Boot, Next.js, PostgreSQL, Redis, RabbitMQ, Flutter, Firebase, and AWS S3. Open to international remote and relocation opportunities.

Skills

- **Backend Engineering:** Node.js, NestJS, Java Spring Boot, REST APIs, Prisma ORM, PostgreSQL, MongoDB, Redis, RabbitMQ
- **Frontend Engineering:** React, Next.js, TypeScript, Angular, Tailwind CSS, Chakra UI, shadcn/ui, Shopify Liquid
- **Mobile & Product Apps:** Flutter, Firebase, MongoDB, booking flows, real-time updates, geolocation, mobile-first systems
- **Cloud & DevOps:** Cloudflare, Plesk, Vercel, AWS S3, Docker, CI/CD workflows, CDN, SSL, domain provisioning
- **Architecture & Integrations:** SaaS platforms, multi-tenant systems, CRM integrations, webhooks, JWT SSO, iframe dashboards, API design
- **Tools:** Git, Linux, PlantUML, Jira, BitBucket, Cursor
- **Languages:** Arabic (Native), English (Professional)

Experience

- Jun 2025 -- Aug 2025
Full-Stack Developer — VillageWellth CRM / RaySolution
 - Built and maintained a CRM platform for financial brokers using Next.js, Prisma, and NextAuth.
 - Integrated AI-driven pipelines using Firebase and Gemini to automate client data extraction and insight generation.
 - Designed webhook-based APIs to normalize and ingest data from third-party CRM systems.
 - Implemented JWT-based SSO and iframe-embeddable dashboards for secure external client access.
 - Worked across product requirements, backend logic, authentication, and front-end dashboard delivery.
- Feb 2025 -- Jun 2025
Full-Stack Developer — Multi-Tenant Blog & CMS Platform (Freelance)
 - Designed and built a multi-tenant SSR blog platform using Next.js and PostgreSQL with tenant isolation.
 - Developed a modular CMS with role-based access, custom theming, and tenant-specific content workflows.
 - Automated domain provisioning, wildcard SSL, and deployment workflows using Cloudflare and Plesk.
 - Integrated Google Ads features and improved SEO/performance using ISR caching and CDN optimization.
 - Managed production infrastructure concerns including DNS, SSL, hosting configuration, and deployments.
- Feb 2024 -- Jan 2025
Full-Stack Developer — Psycode IO
 - Developed and maintained backend and frontend features for POS and internal business systems.
 - Built REST APIs using Node.js and Java Spring Boot with authentication, validation, and secure communication.
 - Designed database-backed features and optimized PostgreSQL queries for production use cases.
 - Built responsive Next.js interfaces aligned with Figma designs and product requirements.
 - Worked on Shopify projects using Liquid, customizing themes and integrating storefront features.
- Sep 2022 -- Sep 2023
Full-Stack Developer — SGSoft SAS
 - Developed backend services using NestJS and REST APIs within a microservices architecture.
 - Integrated AWS S3 for secure file storage and asset management.
 - Used RabbitMQ for asynchronous processing and event-driven communication between services.
 - Built reusable Angular components shared across multiple internal systems.
 - Collaborated on scalable internal platforms with backend, frontend, and integration responsibilities.

Education

- 2016 -- 2022
BSc Computer Engineering — An-Najah National University
